If you want to keep posted in the matter of mines in this district read the PROSPECTOR. It gives you the legal status of the properties and much other news you will not get e'sewhere.

As item in an exchange says that in Pekin, China, slone there 2000 deaths from cholera daily. This seems to be ugly but expressive phrase. an awful large number, but at this rate it would take about six hundred years to kill of the present population of the celestial empire. And yet they say the Chinese must go.

Ir Durrant could get a patent on his face and then charge the San Francisco papers a small royalty on its use he would soon accumulate al vast fortune.

THE San Francisco papers produced pictures of Miss Conseulo Vanderbilt his stick. and the young Duke of Marlborough, who it is announced are engaged. One of the papers innocently asks: "Will she marry him?" Will a duck swim. could be asked with more doubtful measure of affirmative answer. No well brought up and heavily endowed American girl ever yet refused an impecunious foreigner with a handle to

Ws see that it has been estimated by well informed authorities that it takes an average of over \$2,000,000 to convert one Chinaman, and then it is very doubtful if he is converted at all. But the worst of it is that for every Chinaman converted to Christianity, at least a thousand Christians have been converted into copers. About all a celestial cares for Christianity is what he can see in it from a monetary point of view.

It is said that according to Corean law one who owes money and at the proper time fails to pay it, whether the debt be due to his majesty the king or to another person or other persone, shall be besten two or three times a month on the chin, and this punishment shall be continued untithe debt is discharged. If a man died in debt his relations must pay the debt or be beaten two or three times month on the shin. If this law was enforced in Christian countries standard oil and whisky combinations would not be in it with a crutch trust.

Ir is a good sign for the country that all the boys and girls are so anx- a stone shure!" ious to get schooling. Our Tombetone school reports have shown that this anxiety is very strong in this city. The boy or girl who does not want to go to go to school is hard to find; it seems that even children who are under the school age seek almission to school. Truly, the rising generation is a hopeful one. Education and intelligence are essential to the perpetuity of our free institutions.

WHEN they give an exhibition of any kind over in Mexico, they do it up in first-class style. There is no faking. In celebrating their Independence day they carried out the programme to the letter, and threw in a good measure in the shape of ten people killed and sixty-eight wounded in the vorious sham battles and military manœuvers that were gone through with. A lew dead and maimed soldiers don't count on an occasion of this kind in our sister republic. What the people want and demand is the sport.

THE story sent out from Denver, relative to an experiment ordered by the United States army authorsties, is incredible. The story goes that a lot a pleasant fraternal visit and spoke in of soldiers were ordered to make a glowing terms of our climate and its three days' march and, by way of experiment, was compelled to sustain themselves on some indigestible compounds, which a war department genius had invented as "compressed food." The soldiers tried their best to get away with compressed soup and coffee tablets, but after one day's trial were seized with violent pains and could not proceed on their march. The medical officer accompanying them telegraphed these facts back to Denver, but the reply he got was that the experiment was to be thoroughly tried and the men would have to remain on the march, no matter whet

BISBEE, September 25, 1895, RECENT ARRIVALS.

Today's train brought Mr. Leggett and family from Nogales. Professor Douglass also arrived; the train was delayed on account of his instility to 8' r months..... 2 00 reach Benson until several hours after its usual starting time. The advent of the Professor is ever pleasing to Bisbeeites, for if there is one thing we enjoy in our little town it the Professor's instructive and entertaining lec-

ONE OF THE DALTON BOYS

A Brother of the Desperadoes A Tombstone Man Commits the Passes Over the S. P.

Among the passengers of the west bound Southern Pacific train on last night was one whose name has become infamously well known from one side of the country to the other, though he has done nothing to spread the infamy. He was Link Dalton, brother of the notorious Dalton brothers, the most renowned train robbers since the Messrs, James, Younger & Co. took down their sign and went out of business pearly a dozen years ago.

Link Dalton is a prosperous and, said to be, an honest farmer and stockman along the Kansas and Oklahoma line. He first came into prominence a couple of years ago when one of the brothers and others of the gang were killed in a disastrons raid upon a Coffeyville, Kansas bank. His connection with the affair was only the taking charge of his brother's remains.

The Star says his trip west this time s made for the purpose of visiting a sister and a sister-in-law, a widow of Bill Dalton, now living in Fresno.

Mr. Dalton is a good looking man of 43 though he seems ten years younger. He says little of the crimnal side of his brothers' career, though se speaks in a general way of their ebellion against society. Said he: There's fight in the Dal on blood and t came out of them that way." One ould easily imagine trom the most arcless observation of the speaker hat it wouldn't take very dilligent earch to find some of the Dalton fight
